# Acknowledgements

I would like to acknowledge the following reviewers for their helpful comments and suggestions.

- Physics adjunct instructors who provided feedback about the labs
  - Tom Neal, Physics Adjunct
- Physics faculty who designed and contributed to the design of the lab experiments
  - Jack Wells
  - Dr. Wes Ryle
  - Dr. Jeremy Huber

# Chapter 1

## PHY121L: General Physics (algebra-based, fall)

### 1.1 Meaningful Measurements

Location	Equipment	Notes
For Each Lab Station		
AF34-14	1 metric ruler	could be a 1-foot ruler or a 0.25-meter stick
AA13	1 Vernier caliper ( <a href="#">Figure 1.1.2</a> )	Ask faculty if they want digit or analog before and after lab, verify digital calipers are turned off
AA14	1 micrometer ( <a href="#">Figure 1.1.2</a> )	before and after lab verify jaws are not tight
AE82	3 objects to measure	Ask faculty which objects they want (smooth sphere, rough sphere, cube, block of metal, irregular shape, etc)
AE21	string	sufficient string to tie onto the objects in order to immerse them in the cylinder and retrieve them
AF55-19	1 tall, skinny, graduated cylinder	at least 2 of the 3 objects should fit inside the graduated cylinder
At the front for students to share		
S224		
AF36-4	at least 1 digital scale	the available scale(s) should be able to weigh the chosen objects

**Table 1.1.1:** Equipment Needed: Meaningful Measurements

**Figure 1.1.2:** The Vernier Caliper

**Figure 1.1.3:** The Micrometer Caliper

(Updated: September 6, 2017)

A digital version of the lab should be found at <http://physics.thomasmore.edu/PHY121Lab/c-meaningful-measurements.html>

A PDF version of the write-up might be found at [Measurement.pdf](#) (291 kB)

## 1.2 Standard Deviation

Location	Equipment	Notes
At the front for students to share		
AL32-5	several boxes/bags of pennies	in sufficient number for each student to have up to 50 pennies

**Table 1.2.1:** Equipment Needed: Standard Deviation

(Updated: September 6, 2017)

A digital version of the lab should be found at <http://physics.thomasmore.edu/PHY121Lab/c-standard-deviation.html>

A PDF version of the write-up might be found at [StDev.pdf \(232 kB\)](#)

## 1.3 Constant Acceleration

**Verify** Are the carts at AF22 or AF32?

Location	Equipment	Notes
For Each Lab Station		
AF12 (tube)	1 track	.
S224	1 motion sensor (same as “sonic ranger”)	Should have a black-yellow plug
AF22-2-13	1 cart with “sail”	these are in a large box labelled “DYNAMIC CARTS AF22-2-13”
AF15	Wood Squares	probably 2-3, used to prop up one end of track
either AF35 (shelf) or AE82 (drawer)	1 metal ball (any size)	used to level the track
AF34-14	ruler	used to level the track
-	Pasco	Computer
At the front for students to share		
AA41 or AA42 (drawers)	1 gravity protractor	This is the large yellow protractor
AF44	1 pendulum bob	.

**Table 1.3.1:** Equipment Needed: Acceleration

**Verify** Are the protractors at AA41 or AL14-2?

2-sized blocks??? (AF151-1)

(Updated: September 6, 2017)

A digital version of the lab should be found at <http://physics.thomasmore.edu/PHY121Lab/c-acceleration.html>

A PDF version might be found at [Acceleration.pdf](#)

## 1.4 Newton's 2<sup>nd</sup> Law on a Linear Track with the Sonic Ranger

Location	Equipment	Notes
For Each Lab Station		
AF12 (tube)	1 track	.
S224	1 motion sensor (same as "sonic ranger")	Should have a black-yellow plug
AF22-2-13	1 cart	these are in a large box labelled "DYNAMIC CARTS AF22-2-13"
AF22-2-13	2 wooden cart-block	these are in a large box labelled "DYNAMIC CARTS AF22-2-13"
AF22-2-13	1 pulley	these are in a large box labelled "DYNAMIC CARTS AF22-2-13"
???	string	There should be pre-cut string that is long enough to reach from the cart, over the pulley and to a hanging mass. About one meter long
AF22-2-13	light plastic bucket	These might already be attached to the string
either AF35 (shelf) or AE82 (drawer)	1 metal ball (any size)	used to level the track
-	Pasco	Computer
AF44	weights	these are to ride the cart. Should be an assortment of 100-500 grams to ride the cart and an assortment of very small masses (1-2 grams); pennies work well for the small masses.
AF34-14	ruler	used to level the string
At the front for students to share		
.	.	.

**Table 1.4.1:** Equipment Needed: Newton's 2<sup>nd</sup> Law on a Linear Track with the Sonic Ranger

(Updated: September 8, 2017)

A digital version of the lab should be found at <http://physics.thomasmore.edu/PHY121Lab/c-Newton.html>

A PDF version might be found at [Newton.pdf](#)

## 1.5 Next Lab

Location	Equipment	Notes
For Each Lab Station		
AF12	1 track	.
At the front for students to share		
.	.	.

**Table 1.5.1:** Equipment Needed: Next Lab

(Updated: September 8, 2017)

A digital version of the lab should be found at <http://physics.thomasmore.edu/PHY121Lab/c-labname.html>

A PDF version might be found at [labname.pdf](#)
